

QLD Cypress Bollards

Economical: Cypress is the most economical naturally durable species available. Making it a very cost effective long term solution.

Durable: Cypress is naturally durable up to 25 years in ground. Far superior to pine and most hardwoods.

Environmental: Cypress has a unique aroma which gives it a naturally resistance to termites and therefore does not require toxic chemical treatment.

Sustainable: Cypress grows prolifically in state forests and private properties throughout Australia. There are approximately 1,000,000 hectares of commercial Cypress forests, making it the major timber species available in Australia.

Our entire range of bollards are available in Cypress and can be pre-oiled for to match your 3 favourite hardwoods.
